User will choose the game

User will input his code "Coupon "

The system will validate that it not been used before.

Go to user registration

       Phone

       Sex :

       Age group :

       City: drop list

User will receive pin code for claiming the prize if he wins

Play the game

Save his daily score, the system will check for the game timer all gams will end at 24:00 every day.

User can extend his game time by using new code" within one hour from the end of the game, this will only work with games that were started with codes from product purchase, not promotion code. We will have a different flag for each type of coupon.

This is the structure we recommend you can add more field as you see fit

Coupon database
